Professional Summary

Senior Product Designer with 5+ years of experience designing AI-powered and SaaS products across CRM, WealthTech, and enterprise software domains. Expertise in product design, UX strategy, interaction design, user research, usability testing, design systems, accessibility, information architecture, and product discovery. Experienced in design-to-development handoff, frontend collaboration, React-based design systems, and AI-assisted workflows. Proven track record of driving adoption, strengthening usability metrics, and delivering scalable digital experiences through cross-functional collaboration with product, engineering, research, and business teams.

Technical Skills

Design Tools: Figma, FigJam, Figma motion, Figma Slide, Figma Make, Miro, Adobe Creative Suite, UserTesting, Prototyping Tools

Frontend Familiarity: HTML5, CSS3

Design Systems: Component Libraries, Interface Standards, Accessibility Standards, Responsive Design, Mobile-First Design

Research & Strategy: User Interviews, Usability Studies, Personas, Customer Journey Mapping, Heuristic Analysis

AI & Product: AI Product Design, Generative AI, GenAI for UI/UX, Human-AI Interaction, Prompt Engineering, AI-Assisted Workflows, SaaS Product Strategy

Collaboration: Agile Methodologies, Cross-Functional Collaboration, Stakeholder Communication, Developer Handoff

Professional Experience

Senior UI/UX Designer, Zentrades AI

Oct 2025 – Present

UI/UX Designer

Pune, Maharashtra

- Orchestrated end-to-end UX strategy for AI-powered CRM workflows, translating complex service operations into intuitive digital experiences.
- Structured scalable product interfaces that balance automation, usability, accessibility, and user control.
- Partnered with engineers to translate AI workflows into implementation-ready user experiences, supporting efficient design-to-development handoff.
- Established reusable component libraries and interface standards to accelerate design delivery across CRM product modules.
- Collaborated with frontend teams using React-based design systems to ensure accurate implementation of product experiences and reusable components.
- Crafted product narratives and visual communication assets that strengthened brand positioning and customer engagement.
- Applied GenAI-enhanced design workflows to accelerate ideation, prototyping, design reviews, and cross-functional collaboration.

Senior UX Designer, Centricity Wealth Tech

Apr 2022 – Sep 2025

Senior UX Designer

Gurgaon, India

- Led UX strategy and execution for complex enterprise WealthTech SaaS products across web and mobile platforms.
- Conducted 25+ user interviews and 23 usability studies to uncover user pain points, workflow gaps, and product opportunities.
- Elevated workflow efficiency by 30% and boosted customer satisfaction scores by 20% through evidence-based design decisions.
- Produced end-to-end experience artifacts including journey maps, user flows, wireframes, prototypes, and information architecture.
- Collaborated with product managers, engineers, and researchers to align product design decisions with business goals and technical constraints.
- Mentored junior designers while promoting accessibility standards, iterative design practices, and design system adoption.
- Engineered a structured onboarding ecosystem adopted across 5 SaaS launches, accelerating activation rates by 33%.
- Streamlined onboarding experiences, resulting in an 18% decline in customer support dependency during initial product adoption.

UX Designer, Mr. CTO Nex X

May 2021 – Feb 2022

UX Designer

Bangalore, India

- Delivered production-ready interfaces emphasizing accessibility, visual hierarchy, responsive behavior, and mobile-first usability.
- Performed competitive analysis and heuristic evaluations to guide product refinements and customer experience enhancements.
- Coordinated with developers and stakeholders to ship polished product experiences aligned with user needs and business requirements.
- Reimagined first-time user journeys using usability insights, driving a 30% uplift in early-stage product engagement.
- Standardized UX workflows across 4 product teams using Figma and Miro to strengthen design consistency and documentation quality.
- Shortened design iteration cycles by 28% for enterprise SaaS platforms through scalable UX processes and reusable design assets.

Digital Marketing & Graphics Designer, Yantromintra

Jan 2021 – Mar 2021

Digital Marketing & Graphics Designer

Bangalore, India

- Produced 50+ marketing visuals, brand assets, and campaign creatives across multiple digital channels.
- Raised campaign engagement by 35% through stronger visual communication, typography, layout, and branding consistency.
- Developed client-aligned brand guidelines, reusable templates, and creative systems for faster campaign execution.
- Reduced project turnaround time by 20% by organizing digital asset libraries and Adobe Creative Cloud templates.

Independent Projects

Aimate – AI Visibility (AEO/GEO) SaaS Platform

Founder

- Founded and independently designed Aimate, an AI-visibility intelligence platform that measures how businesses appear in AI search engines such as ChatGPT, Gemini, Claude, and Perplexity.
- Designed the full product end-to-end: marketing website (hiaimate.com) and the complete B2B analytics application, including onboarding, business analysis, competitor tracking, prompt visibility, citation intelligence, GEO visibility (Google Search Console integration), and an embedded AI website chatbot with live visitor tracking.
- Defined product IA and role-based access model (Developer, Super Admin, Business Owner, Marketing Manager, and more) across a dense multi-module dashboard.
- Led brand identity and go-to-market execution: logo and visual identity, pricing strategy, outbound sales campaigns, and marketing content.

Key Achievements

Accelerated onboarding activation by 33% across 5 SaaS product launches.
Reduced onboarding-related support requests by 18% through UX optimization and self-service guidance.
Boosted customer satisfaction scores by 20% through research-driven product design improvements.
Won 1st Place – Best UI Design Hackathon at Centricity Wealth Tech for an AI-powered wealth management experience.
